## STRAIT-LINE™ HITCH KITS

This is the ultimate hitch in detail and design. No other hitch gives the driver the control this one does at a reasonable price. The Strait-Line Hitch consists of our patented Dual Cam High-Performance Sway Control and our High-Performance Weight Distributing System in one easy-to-install package.

The Strait-Line Hitch was given this name as its pro-active design literally forces the trailer to stay in a straight line behind the tow vehicle. Sway is controlled by the Dual Cam High-Performance System. The stronger the sway force, the more the Dual Cam System works to stop it.

The Strait-Line Hitch combines weight-distributing with the best proven pro-active sway control system available in a newly-designed, easy-to-install kit.

- Simple installation and adjustment
- Fully automatic and self-centering
- Hooking up spring bars automatically hooks up sway control
- Reduced noise
- No U-bolts to conflict with bottle racks or other A-frame mounted items
- Specific attachment reference points provided
- Easy adjustment of centerline
- No need to relocate items on top of A-frame to install Dual Cam High-Performance Sway Control
- Limited lifetime warranty

## HIGH-PERFORMANCE TRUNNION STYLE

Reese has combined the best of the features from all of our weight-distributing kits to create the High-Performance Trunnion Kit. It includes a head design with superior strength and easy adjustment.

The head includes a forged raised ball platform and forged Trunnion mounts. The channel of the head utilizes our “serrated washer” design. The serrated washers make it easier to dial in the set up of the High-Performance Weight Distributing Kit.

In addition to the changes in the head, the High-Performance Weight Distributing Kit includes the highest rated spring bars per class in the industry. They also feature an integrated cam for easy set up with the optional Reese Dual Cam High-Performance Sway Control. Other features include 9-link chains for easier set up on larger trailer frames and innovative snap-up brackets designed for superior strength and durability.

- Raised hitch ball platform eliminates the need for raised hitch balls
- Easy-to-use serrated washers for head adjustment
- Forged ball platform and spring bar mounts
- Rated up to 1,200 lbs. TW and 12,000 lbs. GTW
- Limited lifetime warranty

## SINGLE SPRING BAR WEIGHT DISTRIBUTING HITCH KITS

This Light-Duty Weight Distributing system is especially designed for use with lighter weight trailers and pop-up campers. The center mount single bar is contoured to avoid interference with center mounted jacks. Easy to set up and use. The lift mechanism is designed to prevent interference with gas bottles or battery trays. Works with any 2" receiver.

A-Frame trailers must have adequate mounting space for the cross-brace bracket. The cross-brace bracket must be mounted 18" to 26" rearward of the center of the coupler ball receptacle. Make sure the trailer is clear of any gas bottles, battery trays, or other obstructions within this area. See example below.

The integrated lift bar feature provides the advantage of allowing a single person to operate this light duty kit from one side of the trailer. This system works with both side and center mounted tongue jacks.

The sway control platform allows you to use a friction sway control on either side of the trailer.

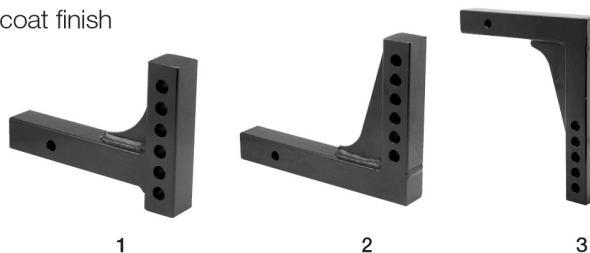

- Bolt-on head with weight-distributing shank
- Models for both a-frame and pole-tongue trailers
- Rated up to 4,000/400 lbs. weight distributing
- Innovative single spring bar design
- Integral sway control platform
- Assembly hardware, and chains included

## ADJUSTABLE HITCH BAR

- All Reese adjustable hitch bars can be used in raised or dropped position
- Long hitch bars provide the extra length for bumper clearance
- Adjustable hitch bars can be used with round bar or high-performance weight-distributing systems

### HOW TO MEASURE FOR THE PROPER HITCH BAR

Refer to the diagrams below to assist in determining the correct Length, Rise & Drop required when selecting the correct shank for your Weight-Distributing Hitch.

## VALUE PRICED WEIGHT DISTRIBUTION

### PRO SERIES SC (WEIGHT DIST. W/ BUILT-IN SWAY CONTROL)

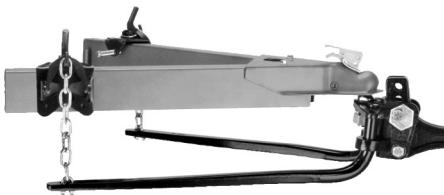

We have combined the best features from our legendary REESE heavy-duty weight distributing kits & friction sway controls to create Pro Series SC. From the proven REESE style head and adjustment system to the new innovative adjustable clamp on brackets with built-in sway control, the new Pro Series SC takes the integrated friction sway control concept to the next level. Unlike competitive units that don't provide enough friction to make much (if any) difference in sway resistance, our new Pro Series SC actually works to resist sway in all weather conditions! Best of all this system is fast to install, and affordable to all.

## DUAL CAM HIGH-PERFORMANCE SWAY CONTROL

This patented product is Reese Products main technique for controlling trailer sway. Unlike Friction Sway Control, this approach works to control sway from the start rather than just resisting sway once it's begun. And it works only when needed. The advantage of the Dual Cam System is its ability to forestall sway in addition to sway resistance. It works to hold down the start of swaying activity while at the same time allowing free and easy vehicle and trailer interaction.

### 26002 1 Dual Cam High Performance Sway Control

Weight-distributing hitch not included; use of sway controls with surge brakes not recommended; this product is recommended to be used with weight distribution that has the integrated spring bars only

## DUAL CAM SWAY CONTROLS

- Dual Cam Sway Control is fully automatic and self-centering
- Hooking up the spring bars automatically hooks up the sway control
- Patented cam design "leans" you into turns

Part No.	Qty.	Description
26000	1	Dual Cam Sway Control Fits 4" & 5" trailer frames

## HIDE-A-GOOSE GOOSENECK

Draw-Tite has designed a new Gooseneck Hitch System to meet YOUR gooseneck needs. Whether you prefer an ABOVE-BED or a BELOW-BED truck bed gooseneck unit, we have you covered. The secret of this system is in the rail kit. We've designed rail kits to fit your specific truck that can attach to either a below-bed head unit or an above-bed FOLD-DOWN gooseneck or REMOV-A-BALL gooseneck head unit.

## SAME RAIL KIT - 2 METHODS OF ATTACHMENT

### FOR BELOW BED GOOSENECK SYSTEM

**STEP 1:** Use fit guide below to select the rail kit for your vehicle.

**STEP 2:** Use fit guide to select the HIDE-A-GOOSE HEAD UNIT for your vehicle.

### FOR ABOVE BED GOOSENECK SYSTEM

**STEP 1:** Use fit guide below to select the rail kit for your vehicle.

**STEP 2:** Select either FOLD-DOWN GOOSENECK (8339) or REMOV-A-BALL GOOSENECK (6300).
